youtube.com/watch?...Page 2youtube.com/watch?... This article is originally published by Mugen Field. To see a list of components that can be found in mugen field, see the list of bestial components of Mugen Field (Mugen Souls) or the list of components of the boss Mugen Field (Mugen Souls) Warning: Be sure to download a patch for the English version before moving to Mugen Field. It is known to crash when a dozing beast collides. The G-Up payout is now higher and depends on the bet. There is much more balancing in the game. Ship Battles and Slumbering Bosses are much harder to win and give most of the rewards, but much harder to get. The Mugen field becomes unlocked after clearing Chapter 3 and watching the Selfina event at the bottom of the G-lock. The contents of the show RoutesEdit Routes in Mugen Souls are similar to the first souls of Mugen, but the names have changed. None of the routes will affect the bosses or the ship of combat complexity, only the factor of chance and the enemy spawn. The player will play through a series of battles before reaching the rest stop. The maximum stop point they reach will depend on the average level of charm. Regular itinerary- Requires the least amount of charm average for access to higher floors. This is a standard route for Mugen Field. Carnage Route- Requires a decent amount of average charm to access higher floors. Enemy caviar are different, as well as their point falls and forces. Whimsy Route- Requires a lot of charm on average for access to higher floors. The same enemy generates as the usual route. It's also the route with the highest chance of getting G-Castle battles and events to miss floors such as shops, items and multipliers, but it's the riskiest since it has the highest chance of sealing important commands. Complexity betting fluctuates Edit has fewer ranges of sophistication than the original mugen soul. There are only 10 difficulty ranges, starting with a minimum bet of 100 Mugen points and a maximum of 9,999,999 Mugen Points. 0000100-0001000 0001001-0005000 0005001-0025000 0025001-010000 0100001-02000000000 020000000 0200001-0500000 0500001-1000000 1000001-25000000 2500001-5000000 5000001-99999 Rest Mugen StopEdit As well as original game, Mugen Recreation Square is set to appear on floors 10, 30 years, 60 and 100. Players can now save their progress to make a break or reboot the file to return to the last Mugen rest area, saved with all the bonuses. If the rest of the stop prevents you from moving further, it means that other rest stops must be unlocked by spending bronze tickets at the Mugen store found in the G-Castle center or on rare occasions when the floor is unlocked, this may mean that the average charm is not high enough. ExplorationEdit It has changed from a simple menu screen to a small explorable area to view events, heal, get a treasure, find random shops or challenge an extra holiday guardian area for bonus interest. Like the rest of Mugen Field, there are occasional treasures and secret shops in the recreation area. Shops. ahead of Shampuru NPC, which brings up Mugen Rest Stop HUD, which seems familiar in the first game, but mugen Development Center works many different. To the left are 3 treasure chests that give random items, the quality of the treasure depends on the Mugen Point stake. On the right is a random event, it will most likely give random treasures, but sometimes it can give rare shops supported by Renegade Skewer, which will sell rare items or tickets. The quality of goods sold depends on the gender. At the end of the corridor is the boss of the rest stop, which is set, according to the rate. The little fry that accompanies this boss are the enemies who meet on the carnage route so this guy's fight can give the components from the enemies 10 floors before this boss. Mugen Development CenterEdit is a place to update characters and unlock limits just like the first Mugen soul, but there are a few differences in Mugen soul, such as the need to visit every Stop vacation to get maximum potential and some name changes. Update LimitsEdit Once the upgrade limit is reached at the Deve Recreation Center, it should be updated on other floors. Once the update has been used enough times on this floor, this particular item can no longer be updated unless you go to another rest stop in which it has not been updated past that limit. Notes Floor 10 Rest Stop can only do one update. Conditional skill slots and protection slots cannot be updated on the 100 floor. Rest Stop 10 30 60 100 Add Sub Party Member 1 1 1 1 1 Bet More MP 1 2 3 4 Update Damage Carnival 1 1 2 4 Raise Level Cap 1 2 3 6 Skill Level Cap 1 1 2 4 Add Cond. Skills Slot 1 1 1 1 - Update Hidden Ability 1 1 1 1 Add Defense Slot 1 1 1 1 - Update descriptionsEdit Update Description Add Sub Party Member adds more sub-party slots, default 8. Used to make several ponies for modernization. The More MP rate increases the maximum rate for the Mugen field, raising this higher will increase the complexity overall. Update Damage Carnival Updates required damage to activate The Damage Carnival. This may sound like a bad thing, but it also dramatically increases payouts and hits for Time Fever. Raising the level of Cap increases the level of the cover of one character, but increasing it also increases the complexity of the mugen box dramatically. The Peons Skill Update can learn skills at certain rest stops. This place can also add conditional skill slots and skill level caps for any character. Don't resume to upgrade skills if they have a high SP because the cost of SP skyrocketed during the upgrade. The latent Ability update opens up weapons and skills, and also makes the bonus higher with certain upgrades. Using what they own will give them bonus stats. Defense Slot gives the character an extra slot for protection, the maximum he can wear is 4 items. Mugen ExchangeEdit The Mugen Exchange is a store that sells peony voices, CGs and tickets for clothes priced at Mugen Points. The word pattern applies A set of clothes that gets unlocked in the clothing store. Mugen Control RoomEdit Place where you can control the Mugen field. You can set limits or release a print that occurred during a random Mugen Field event. There are no print related team skills in this game because they can either have physical or magical skills rather than their own stuff. Limiter Bonus Notes Print Physical Skills 30% Can't use hit all skills such as Chase Beam, Reflection Ball, Tornado Rush, and special skills that cause physical damage. Print Magic Skills 30% Can't Have Elementary Magic, as well as special skills that cause magical damage. Print Recovery Skills 20% Any skill that restores HP or diseases cannot be used, including revive skills. Print Improvement Skills 20% Skills that increase stats cannot be used. Print Special Move 20% All special skills are unusable. Print Ultimate Soul 10% Ultimate Soul and Coffin effect unusable. Having this disabled person will make inverted damage and invincibility battles harder. Print Item Using 15% Item Command will become unsealed, making it difficult to spam revive items or dive through hard floors. Seal batch switch 25% Switch command becomes sealed in combat. Replacing a participant after a knockout or a fight is still possible. Print Blast Off Attacks 20% Your Party Explosion is Off Sealed, but Enemies Can Still Do It. Makes it impossible for the farm to have a fever time with this team sealed. Print Form Change 15% Seal Chow-Chow in the form of team change. Becomes a problem if you want the farm Shampurus and Mo Murder. Renegade Skewer shopsEdit In the room to the right of Mugen Leisure Stop, Renegade Skewer can appear randomly and offer some stores to help the player. It can give healing at the expense of money, sell ordinary items, or in rare cases, Mugen Field floor skipping items or tickets. The most useful service it offers will be the Ticket Exchange, where G and other tickets are used to buy tickets. The higher the rest stop, the higher the quality of tickets that are available. He has a very low chance of appearing, but using Whimsy Route can increase the chances. Rest Stop RequirementsEdit Regular Carnage Whimsy Charm average needed to reach the floor 01 1% 1% Charm average needed to reach the floor 11 3% 5% Charm average needed to reach the floor 31 7% 7% 9% Charm average needed to reach the floor 61 9% 12% 15% Ship BattlesEdit Every 10 floors, Mugen Field will alternate between 3 different types of ships. Each ship will drop 2 Shampurus with a set of quantity, 1 shampoo and 1 soap. The quality depends on the floor on which floor they meet. Floors 50 and 99 are set ship battles with a set of awards. They are a little tougher than those that randomly and drop two special types of skewer along with shampoo and soap. The BattlesEdit assault can be unlocked at the Mugen store for the price of 5 Silver Tickets. This is useful if G-Castle can't handle ships at higher Mugen Point stakes, but can take on normal enemies. There is also the possibility of encountering with Renegade Skewer, which drops a special type of Skewer. He may not encounter assault battles on floors 50 and 99, but instead all other types of Champuru. Fighting aboard enemy ships on floors 50 and 99 will give a random amount to Shampoo, Attack Of Shampodu, Defense to Champuru, Magic Shampodu, Distance To Shampodu and Support to Shampuru. The quality of The Skewer depends on the Mugen Point stake and the type of Skewer they drop depends on what type of Champagne fought (e.g.: winning the distance of Champuru will give the distance to Champour). Shampuru quality for assault battles does not depend on the current mugen field floor or route, all floors drop the same skewer and the amount, only bets Mugen Point. All normal enemies fought on the ship from their fellow Carnage Route, also regardless of the route you choose. Selected.
